Learning More About Bills

Each bill introduced during session has its own page on the website. You can find a lot of useful info about the bills and changes to the bills on these pages.

1. Type in the bill name in the search bar in the top right corner of the website page.
 - a. When you search for the bill, make sure to start with “hb”(for house bills) or “sb” (for senate bills).
2. On a bill page, you can find the full bill by clicking the bill number at the top of the page.
3. Details on the bill can be found on the page, like a few sentences about what it does, where the bill is at right now, who sponsors it, and the committee that is looking at it.
 - a. You can also click “History” at the bottom of the website page to see different steps of the process the bill has already been through. This will also say if there have been any changes made to the bill, and who changed it.

Creating a Bill Tracking List

If you want to keep up with where more than one bill is, you can put them together on a list.

1. On the MGA home page, click the “My MGA” button at the top right corner of the page and sign into your account.
2. To create a list of bills, click the “Add List” button on this page.
3. A pop up will open with some choices:
 - a. Name your list under “List Name.”
 - b. Under “Format” choose the kind of file you want the list to be in when you get emails from them with changes to the bills and updates on where they are. (CSV is an Excel File which puts it into a table)
 - c. Under “Email Notice,” click “Yes” to get email updates on where bills are.
 - d. Under “Bill Changes Only...”
 - i. Click “Yes” to get a daily email that only has changes that have happened to a bill or where it is. This is good to use if you have your own list on your computer or written down somewhere. You can use the changes that the email says to update your own list.
